FACULTY

DR. COLETTE C. CAMENISCH studied medicine on the University Hospital in Zürich (Switzerland). In 2003 she has been working in India, Andhra Pradesh, with Prof. Shrinivas Gosla in the Craniofacial Department with the special training in "Cleft Lips and Palate". She moved in January 2008 to Stockholm and worked until 2010 in the Akademikliniken (Sweden) under the guidance of Dr. Per Héden. In 2011 she was attendant in Switzerland (Frauenfeld/ Münsterlingen) to complete her Plastic- and Reconstructive skills. Since September 2012 she is working for the Centrum for Plastic- and Aesthetic Surgery "Centerplast", in the clinic Pyramide in Zürich.

Since 2009 Colette C. Camenisch is an official Trainer for Galderma and involved in studies around the NASHA™ products. She is specialized in the field of "Facial Rejuvenation" and is lecturing in Europe and also in the Middle East, China etc.. Since 2011 she is also a trainer for botulinum toxin in the aesthetic and the medical field regarding hyperhidrosis and migraine therapy.

She is member of Swiss Society of General Surgery since 2004, Junior member of the Swiss Society of Plastic, Reconstructive and Aesthetic Surgery since 2005 and the German Society for Anti Aging Medicine (GSAAM) since 2007.

DR HENRY DELMAR is a qualified Plastic and Aesthetic Surgeon. He is an active member of French and international scientific societies (SOFCEP, SofCPRE, ISAPS). He is also an investigator on medical studies researchers and expert for medical companies. He handles medical and communication trainings for Galderma. He has written several books on facial anatomy, facial rejuvenation and is the author of more than 200 scientific papers. He is also often invited as a speaker in international congresses.

ANDREW M. PICKETT is an internationally recognized expert in the science of botulinum toxin-A. An extensive list of publications and presentations in international journals and scientific events are proof of it. He is member of the British Pharmacopoeia panel of Expert Bio, member of a different learned societies of Microbiology, Toxicology and Movement Disorders and has been member of the editorial board and technical editor for the Journal of Chemical Technology and Biotechnology. He has held management positions in research, production, and development in different biotechnology companies. In 1991, Andrew Pickett joined Speywood Pharmaceuticals Limited (now Ipsen Limited) where he was actively involved in the development and geographical market introduction of Dysport® worldwide. For the last several years he has focused into translating the state-of-the-art toxine science and technology of botulinum toxin into practical knowledge and subsequent benefits for clinician.
